How to Use

First!

When Using for the First Time

You may notice an unusual odor coming from the material of the product. In this case, clean the product by following the steps below.

- ① Pour hot water into the main body and securely close the stopper.
- ② Hold the main body and gently shake it several times to rinse the inside thoroughly (Do not shake it excessively. The hot water may splash out , potentially causing burns.)
- ③ Discard the hot water, and then clean each part.

1

Turn the stopper to remove it.

- Check that the stopper gasket is attached to the stopper.

2

To keep your beverage warm/cool longer, first pour a small amount of hot/cold water into the main body and let it sit for one or two minutes.

- Discard the hot/cold water after preheating/precooling.

3

Pour your hot/cold beverage into the main body.

- Do not insert large cubes of ice. Use small cubes or crushed ice.

4

Place the main body in an upright position and turn the stopper to close it.

- Turn the stopper as far as it will go to securely close it.

5

Hold the main body and open the stopper to drink your beverage.

6

After drinking the beverage, keep the product in an upright position and securely close the stopper.

Caution

- If you place the product in a bag, make sure it is upright to prevent any accidental leakage. The product may leak if you place it on its side.

How to Clean

- ◆ Clean the product on the same day after every use.
- ◆ Use mild kitchen detergent (for table or cookware).
- ◆ Use a soft sponge or cloth.
- ◆ Clean the product thoroughly to prevent any odor.

- ① Wash each part using a sponge with diluted detergent water or lukewarm water, and then thoroughly rinse it with water.
- ② Wipe the water off with a dry cloth and dry the parts thoroughly.

Caution

- Do not soak the main body and stopper when washing them. (Water may enter the stopper.)
- After washing the whole main body, immediately use a dry cloth to wipe off the moisture on its outer surface. Not wiping off all droplets could leave water stains or cause rust and other marks.
- Do not use thinners, cleansers, bleaches, cleaning wipes, metallic scrubbing brushes, or nylon scrubbing brushes.
- Do not use a dishwasher or dish dryer, and do not wash with boiling water.
- Be sure to attach the stopper and stopper gasket.
- When the product is not to be used for a long period of time, thoroughly wash off any marks and then dry it.

If an odor remains on the gasket

■ Removal

Remove the gasket slowly while holding its edge.

■ Attachment

When attaching the gasket, check its direction and ensure it fits firmly into the slot.

Countermeasure against staining inside the main body

For red, rust-like spots or rough areas

Such staining can be caused by minerals in water, such as calcium, magnesium, and iron. It is recommended to clean with citric acid, which is available at supermarkets and drugstores.

- (1) Dilute the citric acid (approximately 10 g) in lukewarm water, and then pour it into the main body.
- (2) After a few hours have elapsed, wash the main body with a soft brush and then thoroughly rinse it.
- (3) Dry the main body completely.

Notes:

1. Tiger section of the dealer where you bought this product or from our local after-sales service representative.
2. Do not use commercially available detergents for thermos flasks or bottles. They are likely to damage the gasket.

The product rattles when shaken.

This is caused by a metal sheet moving inside the product that is used for boosting heat retention.
